

Mobile-X UC Link for UC Platforms

Mobile Call Control for Enterprise

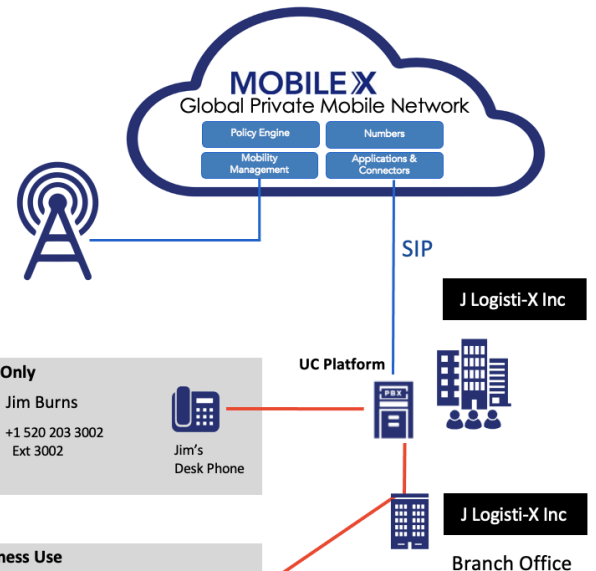

- Enables mobile devices to act as desk phones on the UC Platform
- Simple to use, no app, uses native integration to the mobile network
- Global capable SIM works on multiple networks in any country
- Provides full UC policy control over mobile calls

Mobile-X UC Link opens up existing UC deployments whether on-premise, cloud based or hosted by a CSP. No need for Mobile Apps to be used to make business calls. Mobile-X acts as a SIP endpoint extension and mirrors all call control policies right out to the mobile device. Use with a Business provided Single DDI business Identity for Business provided phones. Also supports Business and Personal Identity where the employee/contractor brings their own personal Dual SIM capable device.

UC Platform Compatibility & Feature Support

Supported Deployments	BroadWorks & BroadCloud	As either Primary Line Device or as Second Simultaneous Ring Device
UC Link Connectivity	Internet connectivity / Direct Connect	Available on Request
UC Link Protocol	SIP-based interconnect to SIP RFC3261	Mobile-X registers as a SIP primary line or SIM-Ring secondary line
Star Code Support	Majority of Star Codes and other feature codes in signalling and dial strings are fully supported	Star codes will be passed through to the UC platform. Some Star codes may not be presented by certain International Carriers
In Call DTMF Support	DTMF fully supported - tones are passed in call RFC2833	
Voice & SMS Recording	Voice recording on Partner UC platform fully supported	Tango Networks Capture Link Product will be available soon Contact your Account manager for details

Core Mobile Services

MO Voice	Voice calls originating from the mobile will be routed via the Mobile-X service directly to the designated UC platform	The UC platform is responsible for terminating all calls, unless Tango Networks is the chosen termination partner
MT Voice	UC platform routes incoming Voice calls to the UC Link endpoint registered as the mobile device	Reseller must Accept responsibility for delivery of Emergency Services Call-back calls; a chargeable number can otherwise be supplied
Codec Support	G711	
MO & MT SMS & MMS	Multi-part SMS is supported MMS treated as 1 SMS + Data at standard rates The Carrier Partner for the Enterprise must route incoming messages to Tango Networks SMSC if numbers are provided by that partner	By default all inbound and outbound SMS will be handled by Tango Networks. SMS Porting is required in the USA Short SMS codes are not supported MMS supported only in the USA, where Bandwidth is required as carrier partner.
Mobile Data	Data Services from the mobile are routed directly to the Internet	2G, 3G and 4G data is supported. Some international carriers may not offer 4G data. Tethering is not supported
Roaming	Roam like at Home and full International Roaming are supported	All features passed through by the host network will be passed through to the UC platform when roaming

Numbering, Porting & SIMs and Mobile Handsets

Customer Provided numbers	Existing employee DDI provided by Customer or Tango Networks as Primary number	Numbers supplied externally must be SMS capable for SMS to work
Porting-in	Fixed and Mobile numbers can be ported in or new mobile numbers can be provided by Tango Networks	There is a set-up charge for number provision. Numbers are charged on a monthly subscription basis
Routing	Partner Carrier Support	Only Bandwidth is supported in USA
Customisation	Full logo, colourisation and URL branding available	SIMs are not branded when shipped, and are supplied in boxes of 100. Min Quantity to order is 100
Mobile Handsets	Almost all mobile devices are compatible	Handsets must be unlocked for use with the Mobile-X SIM

For more than a decade Tango Networks has been a worldwide innovation leader in solutions that enable businesses to adopt mobile communications for greater efficiency and productivity.
